KCOR COMMENT BY mlso: Fri Oct 9 16:52:38 GMT 2020

New kcor camera lookup tables 20201009 were installed. These tables are nearly identical to the last set of tables but no the camera column shifts.

This changed is based on the discovery yesterday that the 2 pixel column shift we saw in the L0 data was coming from the L0 file creation and now the way we read out and applied the lookup tables to the raw data while we were summing the images together. Making this switch should mean that we are now applying the Adc0 lookup table to ADC0 and not ACD2.

GENERAL PROBLEM COMMENT BY lisapg : Fri Oct 9 17:01:01 GMT 2020

Was having trouble logging into our logger on the Shabar laptop this morning. Ben looked into it and the connection kept timing out. Ben has put in an assist ticket and we're hoping to get this resolved soon. Currently ssh on Kcor computer, old school.

KCOR COMMENT BY lisapg: Fri Oct 9 20:37:17 GMT 2020

Kcor got into a bad polarization state just before I took the calibration. Stopping and restarting it seems to have crashed Kcor Synoptic GUI altogether.

GENERAL COMMENT BY lisapg: Sat Oct 10 01:57:15 GMT 2020

Cirrus moved in for the last half hour. Not too bad a day for data but the aerosols got a bit heavy in the afternoon.
