GENERAL COMMENT BY lisapg: Wed Oct 14 17:07:54 GMT 2020

When I came in, Kcor computer was not a happy camper. There was an error and a warning on the screen with labview completely shut down.

the error was:

Windows Script Host

Script: C:\HAO-IG\2525-KCORONA\trunk\SoftwareEngineering\Source-Scripts\file-copy.vbs

Line: 13

Char:1

Error: Path not found

Code: 800A004C

Source: Microsoft VBScript runtime error

the warning was:

Warning!

Please try again later.

After clicking through these errors and opening up the KCor GUI, this popped up

Auto connect did not succeed

Silicon LabsILX Lightwave Instrument Please try again later.

When the Kcor GUIs came up and I tried to start the KCor Focus GUI, three windows popped up

EPDU-DOWN telnet port open by another process

EPDU-UP2 telnet port open by another process

EPDU-UP1 telnet port open by another process

Once I clicked through those pop ups, Labview would not respond.

Restarting the Kcor computer resolved the problems.

KCOR COMMENT BY lisapg: Wed Oct 14 17:40:27 GMT 2020

The calibration file 20201009_200519 was a bad calibration and has been removed. The NRGFs look a lot better.

GENERAL COMMENT BY lisapg: Thu Oct 15 01:38:03 GMT 2020

Clouds and fog for the afternoon. Morning was alright, aerosols got a bit heavy as we approached 11am HST before the clouds rolled in.
