Let there be rain

____end____

GENERAL COMMENT BY lisapg: Sun Nov 15 23:55:43 GMT 2020

Mix of rain and snow flurries blowing down from the summit currently settling over the observatory at present. Nothing sticking yet but the temperature is dropping, currently at 40F.

Now 38 f and a bit of a blizzard going. Went down and stowed GONG. Going to head down the mountain, the weather looking grim.
