GENERAL COMMENT BY berkey: Thu Jan 28 23:28:49 GMT 2021

UCoMP computer is running into USB resource issues.

Getting an error USB Controller Resources Exceeded.

We might have too many usb devices with on the system once the o1 and diffuser got integrated.

GENERAL COMMENT BY berkey: Fri Jan 29 03:34:06 GMT 2021

Changed out the plug to the dome UPS cable. The new L6-30 plug will fit both the matrix and dome closure UPS's

____end____

UCoMP COMMENT BY berkey: Fri Jan 29 03:51:17 GMT 2021

Testing on the O1 focus range with the Badder ND filter in the beam no diffuser, no cover no occulter.

Lots of minor software gremlins.

Initial look at the data shows we do not have enough range on the O1 to focus the the sun in the 530 pre-filter. We will need to review the fits files to be sure. But right now it looks like the O1 either needs to move sun ward on the instrument plate needs to go anti-sunward.

The image of the sun is also not well centered on both cameras. Rcam is worse in X and Tcam is worse in Y with a little de-center in X.
