Fri May 21 15:36:27 GMT 2021

Year: 21 Doy: 141

Observer: lisapg

WEATHER COMMENT: lisapg: Fri May 21 16:18:15 GMT 2021

Temp: 39.6f with windspeed at about 9-14mph from the West-Southwest. Clouds on the Eastern horizon and orographic clouds bring a light rain over the observatory from the Southwest. Waiting for better conditions before opening.

UCoMP COMMENT BY berkey: Fri May 21 20:39:45 GMT 2021

Testing out some recipe files to check for focus. Dome is still closed due to clouds so we expect all the data to be dark.

\*\*UCoMP PROBLEM COMMENT BY berkey\*\* : Sat May 22 01:09:47 GMT 2021

Looks like we were using some old code to move the O1. A focus test this morning took 2+ hours to run, but with the new code that polls the O1 position instead of just waiting a chunk of time that came focus test looks to run in under 20 minutes.

GENERAL COMMENT BY berkey: Sat May 22 01:10:42 GMT 2021

Weather got bad this afternoon thunder/lightening, heavy rain, hail.
