
Mauna Loa Solar Observatory Observer's Log

Sat May 22 16:56:06 GMT 2021

Year: 21 Doy: 142

Observer: mlso

WEATHER COMMENT: mcotter: Sat May 22 16:58:50 GMT 2021

Temp: 42.8f, Humidity: 70%, Pressure: 28.817in, Wind: 0mph from 231degs, Skies: Altocumulus with some high altitude Cirrus clouds are scattered across the sky. Hazy conditions with an inversion layer at or above Maunakea. Very wet conditions here at the NOAA facility from melting snow and hale that fell yesterday and last night.

GENERAL COMMENT BY mcotter: Sat May 22 16:59:32 GMT 2021

Cannot open dome at this time due to cloud coverage and hazy skies.

WEATHER COMMENT: mcotter: Sat May 22 21:40:43 GMT 2021

Temp: 44.5f, Humidity: 74%, Pressure: 28.846in, Wind: 6mph from 127degs, Skies: The skies have been overcast with dark gray clouds for several hours. Rain mixed with sleet is currently falling and thunder can be heard repeatedly and is getting louder. The clouds are moving in from the east and the sky in that direction is very dark gray. I am closing up the observatory and heading down the mountain.
