GENERAL COMMENT BY lisapg: Thu Jun 24 19:26:14 GMT 2021

Shutting instruments down and closing the dome. There's digging being done around MLO towards the North and I'm seeing dust float across the Sun.

GENERAL COMMENT BY lisapg: Thu Jun 24 19:48:41 GMT 2021

Was able to talk to the foreman, his name is Chris; they started excavation work for the tower that is being put up behind the kneeling building. The schedule we received a copy of from Darryl via Terry had them moving equipment all day today and the start of excavations on the 28th.

They are hoping to finish today at 12pm HST but if that does not happen, they may be up tomorrow to finish excavating the site.

GONG COMMENT BY lisapg: Thu Jun 24 20:10:44 GMT 2021

Went down to the GONG shelter and opened the door; the temperatures were in the yellow when I came in and were climbing as the morning went on.

GENERAL COMMENT BY lisapg: Thu Jun 24 22:25:57 GMT 2021

Currently finished excavating, however, they are waiting for another truck load of gravel to off load before heading down for the day.

Will start up again once they have offloaded and dust has settled.

GENERAL COMMENT BY lisapg: Thu Jun 24 23:00:42 GMT 2021

Gravel has been off loaded and it looks like the dust has finally settled.

GENERAL COMMENT BY lisapg: Fri Jun 25 01:44:35 GMT 2021

Day started off good, unfortunately we shut down due to dust and particulates in the air. The afternoon was too bright for

Kcor and it was in and out of clouds until fog crept in for the rest of the day.
