****Possible CME in Progress berkey**** : Sun Jan 09 23:18:07 GMT 2022

Observers report with high confidence a fast CME seen launching near PA 50 with a minimum width of 30 degrees at UT time 22:30 UT.

____end____

****EVENT COMMENT BY berkey**** : Sun Jan 09 23:24:07 GMT 2022

Looks like we had a dark cavity above the disk at PA130 that closed up about 21:15UT. This cavity looks a little strange to me.

KCOR COMMENT BY berkey: Mon Jan 10 00:50:38 GMT 2022

Replaced hepa hoses with something a little more rigid (with less corrugation) to get more flow

___end___

GENERAL COMMENT BY berkey: Mon Jan 10 00:51:17 GMT 2022

Clouds clearing up a little. Hope to get some data between the clouds.

KCOR COMMENT BY berkey: Mon Jan 10 02:43:24 GMT 2022

Started trying to bring up the spar MC4u on a lab bench down stairs. It can power on but I haven't yet figured out how to talk to it over ethernet. The operation mc4u Ethernet cable was briefly disconnected at the rack mounted switch in-case there was a conflict talking to 2 on the same computer. This appears to not be the case or at least the reason I cannot talk to the spar unit. The operational unit is plugged back in and appears to be able to move the stages when as expected.
