KCOR COMMENT BY mcotter: Mon Jan 10 18:17:12 GMT 2022

Kcor instrument now running.

SGS offsets: X (RA): 45, Y (Dec): -10.

Polarization checked good: Mid, Bright, Dark, Mid.

___end___

KCOR COMMENT BY mcotter: Mon Jan 10 18:20:15 GMT 2022

When running the focus routine the sky looked a bit bright, but a well shaped parabola was obtained on first run.

Kcor Stand Alone images and NRGF image both look good.

****Possible CME in Progress mcotter**** : Mon Jan 10 20:01:10 GMT 2022

A second CME appears to be launching out of the same area as the first CME reported earlier.

Approximate PA: 45 Deg.

UT: 19:42:07.

WEATHER COMMENT: mcotter: Tue Jan 11 01:10:45 GMT 2022

Aerosols are increasing and the image quality is getting poorer. The skies are still clear but the aerosols are quite noticeable.

___end___

GENERAL COMMENT BY mcotter: Tue Jan 11 01:33:54 GMT 2022

Aerosols have continued to increase. The images are getting poor. Both instruments have been stopped due to sky conditions.
