WEATHER COMMENT: mcotter: Mon Mar 14 19:44:35 GMT 2022

High altitude Cirrus and Cirrostratus clouds have increased and now the entire sky is lightly overcast with high altitude clouds.

WEATHER COMMENT: mcotter: Tue Mar 15 00:06:11 GMT 2022

The high altitude Cirrus and Cirrostratus is getting thicker and there is now a halo around the Sun. Looking at the satellite images it appears that the high altitude clouds are moving in from the northwest and there is a long line of clouds in the images. It is likely these conditions will continue throughout the remainder of the day.
