KCOR COMMENT BY berkey: Sat Apr 02 00:24:46 GMT 2022

The aft-end supporter installed between the kcor aft-optics plate and the 8020 rail on March 28th seems to have a noticeable effect on the pattern of motion we see between the occulter and detectors over the observing day.

As a test the bolt on the support was extended another 1mm to see if this changes the behavior.

GENERAL COMMENT BY berkey: Sat Apr 02 02:48:46 GMT 2022

Nice day over all medium aerosols in the middle of the day but low aerosols in the morning and afternoon.
