Mauna Loa Solar Observatory Observer's Log
      Sat May 14 16:34:22 GMT 2022
Year: 22 Doy: 134
Observer: mlso
WEATHER COMMENT: mcotter: Sat May 14 16:39:05 GMT 2022
Temp: 39.9f, Humidity: 17%, Pressure: 28.684in, Wind: 3mph from 180degs, Skies: Cloudy
with drizzle and mist in the Saddle Valley to approximately 7000' elevation. Mostly cle
ar skies over the the observatory except for some Cirrocumulus clouds sprinkled across
 the south-southwest and western skies. So far these clouds are not in the viewing area
but the sky does appear a bit bright. Heavy blue gray inversion layer located below Ha
leakala, wit a orange brown haze located above the inversion layer. Light wind from the
 south.

UCoMP COMMENT BY mcotter: Sat May 14 17:12:24 GMT 2022
When I came in this morning the Ucomp computer showed the initial desktop screen when a
user signs on and enter a password, but the computer was completely unresponsive to bo
th the keyboard and mouse. I disconnect the power cord from the back of the Ucomp compu
ter, waited 30 seconds, and re-energized the computer. The computer came up normal but
a GUI came up and said the the Labview program was incorrectly shutdown. It asked if I
wished to recover any information and I clicked "Yes". A GUI came up asking me to name
a file and save so I name it with today date, May, 14, 2022, and proceeded to open up t
he Ucomp-Controller GUI. Everything appeared to come up fine, but the "Camera" LED has
not come up yet. I went to the back of the rack and pulled the "Camera Power" power cor
d from the orange receptacle and waited 30 seconds. I re-energized the cameras but the
LED still has not come on. I closed down the Ucomp-Controller GUI and the Labview progr
am. Again I re-started the Ucomp- Controller program and the GUI seems to have come up
normally.
The Ucomp instrument is now running normally and on sky.

****Possible CME in Progress mcotter**** : Sat May 14 17:47:53 GMT 2022
Observers report with MEDIUM confidence a CME seeing launching near PA 145 deg with a m
inimum width of 10 deg at UT time 16:56:07.
This CME appears to be in an early stage and was in motion when I logged on this mornin
g. According to my data it has not launched away from the Sun as yet, but I anticipate
it will soon.
  _end_
Sat May 14 17:48:50 GMT 2022 UCoMP Paused for clouds
GENERAL COMMENT BY mcotter: Sat May 14 17:49:55 GMT 2022
BUMMER! I just sent out a CME alert and clouds have moved into the viewing area. Hopefu
lly the clouds will pass quickly and we can get back on sky.

WEATHER COMMENT: mcotter: Sat May 14 23:29:51 GMT 2022
The sky is starting to get bright. It is not too bright to observe, but is close. I wil
l continue to monitor conditions and see if conditions worsen.
Sat May 14 23:31:09 GMT 2022 UCoMP Paused for clouds
WEATHER COMMENT: mcotter: Sat May 14 23:31:43 GMT 2022
Orographic clouds are beginning to move into the viewing area from the west-northwest.
Observations have been stopped until sky conditions improve.
  _end_
Sat May 14 23:33:44 GMT 2022 UCoMP Restarted from pause
WEATHER COMMENT: mcotter: Sat May 14 23:36:04 GMT 2022
The clouds that were in the viewing area have dissipated and are now gone. The sky rema
ins very bright but I restarted the Kcor instrument and the synoptic images, though a l
ittle bright, look acceptable.
Kcor and Ucomp are again on sky and observing.

Sun May 15 00:08:30 GMT 2022 UCoMP Paused for clouds
GENERAL COMMENT BY mcotter: Sun May 15 00:09:02 GMT 2022
Both Kcor and Ucomp are now paused due to passing clouds and bright skies.
 ___end__
WEATHER COMMENT: mcotter: Sun May 15 00:34:25 GMT 2022
Orographic clouds have moved in from the west-northwest and the sky is now completely o
vercast. Some of the clouds over the observatory are dark so I have closed the dome shu
tter doors and windows in the even of precipitation.
GENERAL COMMENT BY mcotter: Sun May 15 02:18:44 GMT 2022
Emptied control room trash receptacle.
GENERAL COMMENT BY mcotter: Sun May 15 02:20:23 GMT 2022
The day started out good with bright but clear skies. By late morning early afternoon O
rographic clouds started to make there way into the viewing area and the sky became ver
y bright.
```
