Mauna Loa Solar Observatory Observer's Log Tue Jun 7 16:34:47 GMT 2022 Year: 22 Doy: 158 Observer: mcotter WEATHER COMMENT: mcotter: Tue Jun 07 16:37:12 GMT 2022 Temp: 47.1f, Humidity: 19%, Pressure: 28.638in, Wind: 10mph from 163degs, Skies: Clear but hazy skies. The inversion layer is visible on the horizon just below Hu'ala'lai. Wi nds are cold and steady from the southeast. _end_ GENERAL COMMENT BY mcotter: Tue Jun 07 16:37:23 GMT 2022 PM Blew off UCoMP 01 end GENERAL COMMENT BY mcotter: Tue Jun 07 16:37:34 GMT 2022 PM Blew off Kcor O1 _end_ GENERAL COMMENT BY mcotter: Tue Jun 07 16:38:05 GMT 2022 PM Blew off Kcor Field Lens. end Tue Jun 07 16:40:55 GMT 2022 Running UCOMP Cookbook all_wavelength_coronal_flat.cbk lin e 0 Tue Jun 07 16:52:30 GMT 2022 Kcor Focus/alignment program exited KCOR COMMENT BY mcotter: Tue Jun 07 16:53:05 GMT 2022 Kcor is now observing. end UCOMP COMMENT BY mcotter: Tue Jun 07 16:53:24 GMT 2022 Ucomp is now observing. __end_ Tue Jun 07 16:56:24 GMT 2022 Running UCOMP Cookbook all_wavelength_coronal.cbk line 0 Tue Jun 07 17:24:20 GMT 2022 Running UCOMP Cookbook all_wavelength_coronal.cbk line 0 Tue Jun 07 17:51:47 GMT 2022 Running UCOMP Cookbook all_wavelength_coronal.cbk line 0 Tue Jun 07 18:19:15 GMT 2022 Running UCOMP Cookbook all_wavelength_coronal_flat.cbk lin e 0 Tue Jun 07 18:34:35 GMT 2022 Running UCOMP Cookbook waves_1074_1hour.cbk line 0 Tue Jun 07 19:44:24 GMT 2022 Running UCOMP Cookbook all_wavelength_coronal.cbk line 0 Tue Jun 07 20:12:11 GMT 2022 Running UCOMP Cookbook all_wavelength_coronal_flat.cbk lin e 0 Tue Jun 07 20:22:35 GMT 2022 KCOR Start Calibration script: c:\kcor\mlso-calibration22d eg-20171025.ini Tue Jun 07 20:27:32 GMT 2022 Running UCOMP Cookbook all_wavelength_coronal.cbk line 0 Tue Jun 07 20:37:49 GMT 2022 KCOR End Calibration Script WEATHER COMMENT: mcotter: Tue Jun 07 20:46:56 GMT 2022 So far there are no clouds on the horizon and the wind has calmed down a bit. VOG can b e observed in the distance at lower elevations and the sky in all directions has a ligh t haze. ___end_ Tue Jun 07 20:55:19 GMT 2022 Running UCOMP Cookbook all_wavelength_coronal.cbk line 0 KCOR COMMENT BY mcotter: Tue Jun 07 21:02:12 GMT 2022 The Kcor-Stand Alone Acquisition Synoptic images look very good, i.e. dark black backgr ound with a well defined sharp bright white coronal ring. Though the K-cor synoptic ima ges look quite good the Kcor NRGF image is beginning to show signs of increasing aeroso ls, i.e. grainy appearance on the outer perimeter with softening less focused center ar ea adjacent occulter shadow. I am unsure why this is happening because typically as the Kcor NRGF image gets poorer in quality the Kcor synoptic images also become poorer by growing brighter in appearance. The appearance of the Kcor Quicklook image is also show ing elevated aerosols by getting a little blurry and less defined. __end_ Tue Jun 07 21:23:07 GMT 2022 Running UCOMP Cookbook all_wavelength_coronal.cbk line 0 Tue Jun 07 21:50:43 GMT 2022 Running UCOMP Cookbook all_wavelength_coronal_flat.cbk lin e 0 Tue Jun 07 22:05:54 GMT 2022 Running UCOMP Cookbook all_wavelength_coronal.cbk line 0 Tue Jun 07 22:33:40 GMT 2022 Running UCOMP Cookbook all_wavelength_coronal.cbk line 0 GENERAL COMMENT BY mcotter: Tue Jun 07 22:50:10 GMT 2022 This morning I set the dome slit auto advance control to rotate in the CCW direction to see if it would advance correctly and follow the Sun on it's own. So far so good!

It is at this time (approximately 12:40pm HST) that I have been going to the dome to ma

nually rotate the dome slit because the controls have been getting confused and not tra cking correctly after the Sun reaches zenith. I'll further comment at the end of day if the dome slit has tracked correctly all day o r not. _end_ Tue Jun 07 23:01:07 GMT 2022 Running UCOMP Cookbook all_wavelength_coronal.cbk line 0 Tue Jun 07 23:28:44 GMT 2022 Running UCOMP Cookbook all_wavelength_coronal_flat.cbk lin e 0 Tue Jun 07 23:43:54 GMT 2022 Running UCOMP Cookbook all_wavelength_coronal.cbk line 0 **GONG PROBLEM COMMENT BY mcotter** : Wed Jun 08 00:06:20 GMT 2022 I opened the GONG trailer door as the temp has been inreasing and it is now in the yell ow. **NOTE**: One of the circulation fans has apparently died. I tried the fan on several d ifferent setting and also tried plugging it into a different receptacle, but I was unab le to get it to work. I took a photo of the fan and will email the GONG support team to let them know. _end_ Wed Jun 08 00:11:40 GMT 2022 Running UCOMP Cookbook all_wavelength_coronal.cbk line 0 WEATHER COMMENT: mcotter: Wed Jun 08 00:14:10 GMT 2022 Orographic clouds have come up from the south and west and are now in the vicinity of t he science area. Additionally, aerosols are continuing to increase as the Kcor Synoptic images have brightened up a bit, though they still look fairly good. The Kcor NRGF ima ges continue to show elevated aerosols and the images appear a little grainy. ____end_ Wed Jun 08 00:39:19 GMT 2022 Running UCOMP Cookbook all_wavelength_coronal.cbk line 0 WEATHER COMMENT: mcotter: Wed Jun 08 00:55:20 GMT 2022 Aerosols continue to rise, but so far the clouds to the south and west continue to stay away from the observatory and the viewing area. _end__ Wed Jun 08 01:06:57 GMT 2022 Running UCOMP Cookbook all_wavelength_coronal_flat.cbk lin e 0 Wed Jun 08 01:22:07 GMT 2022 Running UCOMP Cookbook all_wavelength_coronal.cbk line 0 Wed Jun 08 01:50:13 GMT 2022 Running UCOMP Cookbook all_wavelength_coronal.cbk line 0 Wed Jun 08 02:17:40 GMT 2022 Running UCOMP Cookbook all_wavelength_coronal.cbk line 0 Wed Jun 08 02:45:07 GMT 2022 Running UCOMP Cookbook all_wavelength_coronal_flat.cbk lin e 0 GENERAL COMMENT BY mcotter: Wed Jun 08 02:52:44 GMT 2022 The dome slit has continue to track the Sun all afternoon with no mishaps or problems. Going forward we should put the dome controls in "Auto" & "CCW", until the Sun is in i ts southerly decent across the horizon; probably sometime mid August. _end_ Wed Jun 08 03:00:17 GMT 2022 Running UCOMP Cookbook all_wavelength_coronal.cbk line 0 GENERAL COMMENT BY mcotter: Wed Jun 08 03:22:57 GMT 2022 Emptied all the trash receptacles in the observatory. Changed the tack mats in the dome vestibule and the clean room. Filled the clean water reservoir and emptied the waste water container under the sink. _end_ GENERAL COMMENT BY mcotter: Wed Jun 08 03:35:41 GMT 2022 Aerosols picked up in the early afternoon, but other than that the skies were beautiful and clear all day! __end____ ONSITE STAFF:
