Sat Jun 18 19:12:58 GMT 2022 UCoMP Paused for clouds

KCOR COMMENT BY mcotter: Sat Jun 18 19:15:18 GMT 2022

Kcor has been pause due to Cumulus clouds in the viewing area that moved up from the Saddle Valley.

____end____

UCoMP COMMENT BY mcotter: Sat Jun 18 19:16:19 GMT 2022

Ucomp has been paused due to Cumulus clouds in the viewing area that moved up from the Saddle Valley.

____end____

WEATHER COMMENT: mcotter: Sat Jun 18 19:17:13 GMT 2022

Cumulus clouds have moved up from the Saddle Valley and are now over the observatory and in the viewing area.

____end____

WEATHER COMMENT: mcotter: Sat Jun 18 20:16:40 GMT 2022

The sky is now almost completely overcast and the Cirrus clouds have gotten darker in color. I have shut the dome shutter doors and windows in the event of precipitation.

____end____

WEATHER COMMENT: mcotter: Sun Jun 19 00:16:36 GMT 2022

The sky is no longer completely overcast but wisps of Altocumulus clouds are scattered all across the sky. The sky overall remains very bright and the Altocumulus cloud tendrils are forming and dissipating continuously above the observatory.

____end____

Sun Jun 19 01:37:21 GMT 2022 UCoMP Restarted from pause

GENERAL COMMENT BY mcotter: Sun Jun 19 01:42:43 GMT 2022

The day started out decent, though a little bright, then Cumulus clouds moved into the viewing area from the Saddle Valley in the late morning and remained for the rest of the day.
