GENERAL COMMENT BY lisapg: Sun Aug 28 17:53:04 GMT 2022

RA error seems to be swinging between 40- -40 every couple seconds and then settles, even though the wind is currently between 0-3mph from the North-Northwest. This happened for about five minutes and now it seems to have settled for good now. Will keep an eye on things.

GENERAL COMMENT BY lisapg: Mon Aug 29 01:03:14 GMT 2022

Morning was okay to take data but aerosols could be seen getting heavy very early on, no data this afternoon. Hope tomorrow is a better day.
