

Mauna Loa Solar Observatory Observer's Log

---

Sun Feb 19 17:15:38 GMT 1995

Year: 95 Doy: 050

Observer: yasukawa

WEATHER COMMENT: Sun Feb 19 17:16:20 GMT 1995

Cool, clear, light southwest wind. Temp=42F.

MKIII COMMENT: Sun Feb 19 17:22:40 GMT 1995

Tried using only puffs from bulb to clean O1.

Sun Feb 19 17:23:27 GMT 1995: Patrol Start

MKIII COMMENT: Sun Feb 19 17:51:16 GMT 1995

Coronal image noisy at E and W wings, P+S looks a bit high.

Unsure if that is the sky or dust on O1 that is difficult to remove with puffer.

Sun Feb 19 18:00:01 GMT 1995: Calibration

MKIII COMMENT: Sun Feb 19 18:09:07 GMT 1995

Must've been sky, noisy wings are gone.

MKIII COMMENT: Sun Feb 19 19:01:39 GMT 1995

Pockets of something can be seen in P+S signal occasionally moving across scan.

Sun Feb 19 19:02:56 GMT 1995: Calibration

DPMON COMMENT: Sun Feb 19 19:22:19 GMT 1995

Faint top[ of arch or loop prominence visible at PA 240 about 1.2 RV. Hard to discern, but may have a footpoint at or near prominence that was visible this morning at PA 230.

DPMON COMMENT: Sun Feb 19 19:31:32 GMT 1995

I don't see that prominence top at PA 240 any more. It either faded or moved out of FOV very rapidly.

MKIII COMMENT: Sun Feb 19 19:36:19 GMT 1995

Enhancement in corona overlying prominence activity region. There is also some streaking-type artifacts in VDIFF. Checking it out.

MKIII COMMENT: Sun Feb 19 19:43:14 GMT 1995

There was a smudge on the back surface of the O1. Wiped it off with a cleaning tissue and dusted off O1 with bulb.

MKIII COMMENT: Sun Feb 19 20:00:39 GMT 1995

CME is definitely occurring over PA 240. Subtle effects seen between PA 240-290. Streaking artifact seems to be gone. Must've been the contamination on the O1.

Sun Feb 19 20:03:01 GMT 1995: Calibration

COMMENT: Sun Feb 19 20:12:27 GMT 1995

Sent out preliminary CMELST alert.

MKIII COMMENT: Sun Feb 19 20:22:29 GMT 1995

Coronal changes still seen in current VDIFFs, changes do not show up on high resolution NDIFFs.

MKIII COMMENT: Sun Feb 19 20:53:01 GMT 1995  
Coronal changes either gone or very subtle.

Sun Feb 19 21:00:01 GMT 1995: Calibration

WEATHER COMMENT: Sun Feb 19 21:36:34 GMT 1995  
Sky getting noisy. Wind coming from west, slightly upslope.

Sun Feb 19 22:03:06 GMT 1995: Calibration  
Sun Feb 19 23:03:07 GMT 1995: Calibration  
Sun Feb 19 23:03:57 GMT 1995: Patrol End

COMMENT: Sun Feb 19 23:05:54 GMT 1995  
Activity report:  
QP: 66; 72; 106; 117; 285; 305'  
EPL: Pa 230-240, RV 1.2+, from before 1922-1931 UT.  
CME: Coronal changes occurred between PA 240-290  
Between around 1922-2053 UT.

TAPES: MKIII: H00969  
DPMON: P00287  
LOWL: L00186
