

Mauna Loa Solar Observatory Observer's Log

---

Mon May 8 17:02:58 GMT 1995

Year: 95 Doy: 128

Observer: koon console May 8 17:01

WEATHER COMMENT: Mon May 8 17:03:02 GMT 1995

Thin to medium cirrostratus overcast, wind=5 mph from the East, temp=40 F.

Mon May 8 18:36:27 GMT 1995: Patrol Start

WEATHER COMMENT: Mon May 8 18:37:17 GMT 1995

A clear spot is approaching, starting instruments.

Mon May 8 19:01:00 GMT 1995: Calibration

WEATHER COMMENT: Mon May 8 19:56:37 GMT 1995

The clouds are getting thicker and extend as far as I can see, even that one thin spot had light cirrostratus in it. Closing down. Will recycle the MKIII tape since there isn't any data on it, dPMon tape may have a decent image or two so I'll save that one.
