COMMENT: Mon Mar 25 20:59:31 GMT 1996  
Guider declination recentered itself while I was distracted  
verifying documentation for Greg Card. Repointed spar and reset  
guider. Also reconfigured dome shutter at this time.

COMMENT: Mon Mar 25 21:03:56 GMT 1996  
Declination resetting again. Repointing and restarting.

COMMENT: Mon Mar 25 21:27:13 GMT 1996  
Declination recentered again.

COMMENT: Mon Mar 25 21:50:47 GMT 1996  
Yikes, the declination ran away again. I checked if the spar  
was off balance, but it didn't seem to be. The wind is very  
strong, but we've dealt with this strength before. There was  
a large dead bug in some oil on the guider filter, probably  
dripped off the dome motor. I wiped it off. Dec still drifting.

COMMENT: Mon Mar 25 22:01:31 GMT 1996  
Guider drift must have been caused by the wind. When gusting  
stopped, the drift stopped and the guider settled down.

Mon Mar 25 22:22:57 GMT 1996: Patrol End
