Year: 96 Doy: 358

Observer: koon

WEATHER COMMENT: Mon Dec 23 17:35:58 GMT 1996

Scattered altocumulus clouds, wind=35+ mph from the SSW, temp=37 F.

COMMENT: Mon Dec 23 17:36:54 GMT 1996

Since it is so windy I'll wait to open dome and start observations until I'm sure that the clouds will clear away.

WEATHER COMMENT: Mon Dec 23 19:04:13 GMT 1996

Altocumulus still blocking the sun, and orographic clouds are blowing over (very fast) from the SW. It is very gusty today, sometimes difficult to walk straight (outside).

WEATHER COMMENT: Mon Dec 23 21:33:41 GMT 1996

Clouds still haven't cleared, no observations today.
