WEATHER COMMENT: Thu May 22 16:58:37 GMT 1997

Cold, in thick cirrus overcast, cap cloud on summit, very strong south wind. Shadows very diffuse so will not open up at this time to avoid any moisture that may blow off cap cloud.

COMMENT: Thu May 22 17:00:06 GMT 1997

Performed GONG weekly preventive maintenance before coming up here this morning.

WEATHER COMMENT: Thu May 22 17:59:15 GMT 1997

Cirrus is thinning, opened dome and starting CHIP. Running DPMON in VIDEO mode until cirrus thins enough to get decent data. MKIII standing by, but observations with it is very doubtful.
