CHIP COMMENT: Fri Jul 18 22:10:36 GMT 1997

As we have seen before, for some reason the CHIP program can't be stopped close to the top of the hour, it continues right through its cal until about 10 minutes pass the hour, at that point we can stop it after one of its observing cycles, but it won't stop on its own even though we click on the END button before 10 minutes after the hour.
