MKIV COMMENT: Wed Apr 28 17:46:01 GMT 1999

Stopping to swap around the tape and disk drives, I think we can make it work with the existing cables if I move the tape drive to the other side of the cpu.

MKIV COMMENT: Wed Apr 28 18:07:17 GMT 1999

OK, drives are swapped and the cables will work with this setup. Upon powerup of the cpu there were error messages and probe-scsi didn't work. As was done yesterday according to David I cycled the power to the disk and tape drives, then probe-scsi worked and the target drives were found. No boo -r was needed.

Wed Apr 28 18:12:09 GMT 1999 MKIII Start Patrol

COMMENT: Wed Apr 28 18:14:19 GMT 1999

Spar pointed off the sun for a while.

CHIP COMMENT: Wed Apr 28 18:14:36 GMT 1999

Paused obs while Spar off the sun.

MKIV COMMENT: Wed Apr 28 18:14:54 GMT 1999

Left this running to test David's new data transmission handshaking. It just happened and it looks good. The windows and fields no longer lock-up after the scan while data is being transmitted as they did before the change.

PICS COMMENT: Wed Apr 28 19:32:51 GMT 1999

Doing a PICS Polarization calibration test.

PICS COMMENT: Wed Apr 28 19:33:36 GMT 1999

There was a cam screw dragging against the filter wheel and causing the Optics tasks to timeout. It has been fixed.

PICS COMMENT: Wed Apr 28 22:49:31 GMT 1999

I removed and cleaned the O1. Started Patrol to see if there is anything visible through the clouds.

WEATHER COMMENT: Wed Apr 28 22:51:01 GMT 1999

Medium cirrostratus overcast, has been cloudy all day.

CHIP COMMENT: Wed Apr 28 22:51:31 GMT 1999

I started this also, since the Spar is barely tracking.
