****MKIII PROBLEM****: Mon May 3 19:05:22 GMT 1999

Found the connector to the corrector control cable at the transformation board not mounted securely at one end. Seated it correctly. I recall that the transformation board was out for repair or modification during the time that the CORRECT was being done and the ring appeared. I am wondering if this caused a bad CORRECT?

****MKIII PROBLEM****: Mon May 3 19:20:27 GMT 1999

Tried swapping corrector tables (good 1997 one) and loading it with allfresh. I saw no change.

GONG COMMENT: Mon May 3 19:27:58 GMT 1999

Going down to GONG to do weekly and monthly PM.

****MKIII PROBLEM****: Mon May 3 20:33:25 GMT 1999

Checked signals at DCSB-analog on spar, ramps look ratty, but could not say that there was any drop-outs at the appropriate heights. Checked balance and offset between A & B preamps. Offset was off and balance was only a hair off. zeroed both.

WEATHER COMMENT: Mon May 3 20:35:58 GMT 1999

Still in thin cirrus.

MKIV COMMENT: Mon May 3 21:48:07 GMT 1999

In cirrus all morning, no good MKIV or MKIII data taken.
I will not leave a tape in nahenahe tonight.
