COMMENT: Thu Jul 29 17:28:10 GMT 1999

Bumped the spar and lost tracking while working on the MKIV problem.

MKIV PROBLEM: Thu Jul 29 17:28:40 GMT 1999

Scans were radially streaky upon startup, probably due to me starting the KCC before having the Analog switch turned on this morning. I cycled Analog and KCC power to try to fix it, then the barrel would oscillate around 85 degrees, apparently due to being at a limit and being confused somehow. So I pushed the barrel around to the other limit (after turning off the main mkIV power switch and the analog switch), then turned the main mkIV power and analog switches back on. The scans look fine now.
