Year: 99 Doy: 337

Observer: yasukawa

WEATHER COMMENT: Fri Dec 3 17:24:00 GMT 1999

In misty cap cloud, cold, southeast wind. Broken altostratus. Around 6 inches of snow on the ground, road icy. Did not lose data on Wednesday, a blue-dot day due to high clouds. Severe thunderstorm Wednesday night thru Thursday afternoon dumped snow down to 9000 feet on Mauna Kea and Mauna Loa. Was not able to get up here yesterday due to slick road conditions, barely able to slip and slide my way up here today to check on building. No leaks into control room, no indication of power outages. No leaks in dome.

COMMENT: Fri Dec 3 20:38:18 GMT 1999

No observations, in cap cloud all morning.

Fri Dec 3 20:39:54 GMT 1999
