MLSO PROBLEM : Thu Jan 27 19:51:05 GMT 2000

OK, I replaced the Electronics Unit for the UPS with a new one that APC sent, the new onw works correctly, The UPS is now fully functional again. This concludes a problem that started last week after the HELCO power outage, the UPS lost it's display and I found that it was in permanent bypass mode and we had no battery power if there were another power outage, I let APC know and they promptly sent us a new EU.
