Year: 00 Doy: 330

Observer: koon

WEATHER COMMENT: Sat Nov 25 17:04:40 GMT 2000

Clear sky, wind=5 mph from the SE, temp=40 F.

\*\*PICS PROBLEM\*\*: Sat Nov 25 19:07:21 GMT 2000

Stalled, did a Kill/Run cycle.

\*\*PSPT PROBLEM\*\*: Sat Nov 25 21:27:12 GMT 2000

Couldn't get images, traced problem to bad shutter, replaced shutter. The shutter looked good and something was making a noise at the right time so I was misled for a while. To complicate things the PC Cmd/Light Control/Shutter (open or close) control on the GUI menus doesn't work. PSPT is running again but I need to find a way to open and close the shutter from PC or Sparc for troubleshooting.
