COMMENT: Mon Jun 4 18:56:03 GMT 2001

Bunny and I are working on setting up kaiee as our pop server for email.

So far she has placed some mail files on kaiee and I can get to them via telnet, but I have not been able to connect via Eudora with the options set to check mail at kaiee.mlso.ucar.edu.

WEATHER COMMENT: Mon Jun 4 19:12:51 GMT 2001

In orographic clouds.

GONG COMMENT: Mon Jun 4 19:53:52 GMT 2001

Exabyte tape at 66% full. Gong crew arriving today and plan to be up here tomorrow to begin GONG+ upgrade. I will opt to not do PM today as they can take care of unloading tape before they start.

COMMENT: Mon Jun 4 20:28:42 GMT 2001

tested connection to kaiee via laptop's Eudora program and I cannot connect to kaiee pop server either.

ECHO COMMENT: Mon Jun 4 21:51:46 GMT 2001

Made another modification to echosys files. Alice uploaded 7 files to copy from FTP/Code over to /echosys and compile.

Test by Alice indicate the mods are working.

COMMENT: Mon Jun 4 21:53:16 GMT 2001

Bunny figured out the problem we were having with the pop from kaiee.

All of the messages she placed on kaiee popped onto Eudora OK.

We tested it one more time, Bunny re-submitted the messages and they popped off OK.

COMMENT: Mon Jun 4 22:20:30 GMT 2001

Still doing more testing on kaiee.

COMMENT: Mon Jun 4 22:40:31 GMT 2001

OK, email setup appears to be working well from PC. There is a safety net set up for now so I don't lose any email during testing. We will test

laptop setup tomorrow.
