Mauna Loa Solar Observatory Observer's Log

---

Sat Jun 23 16:54:09 GMT 2001

Year: 01 Doy: 174

Observer: koon

WEATHER COMMENT: Sat Jun 23 16:54:12 GMT 2001

Medium cirrostratus overcast, no wind, temp=45 F.

COMMENT: Sat Jun 23 16:57:45 GMT 2001

Spar isn't tracking the sun due to clouds, no observations until the clouds thin out.

WEATHER COMMENT: Sat Jun 23 19:07:14 GMT 2001

Cirrostratus is getting thicker as the sun gets higher, still can't track sun.

MKIV COMMENT: Sat Jun 23 20:17:58 GMT 2001

I balanced the Spar in declination, and real close in RA.

WEATHER COMMENT: Sat Jun 23 20:18:52 GMT 2001

Cloud cover keeps getting thicker.
