PSPT COMMENT: Sun Nov 4 21:01:46 GMT 2001

I looked into setting up automatic Start and End time logging from the PSPT Sparc to Nahenahe. The best way to do it would be to add an identical pspt1 account to Nahenahe so rsh and rcp commands could be used via scripts on pspt, but that opens Nahenahe security to whoever has the pspt1 password I think, maybe this isn't a concern anymore if only HAO people access the pspt Sparc now. I'll pursue this more as time allows.

Still have very thick cirrostratus cover, Spar won't track.
