
Mauna Loa Solar Observatory Observer's Log

Mon Feb 11 17:09:26 GMT 2002

Year: 02 Doy: 042

Observer: yasukawa

WEATHER COMMENT: Mon Feb 11 17:09:36 GMT 2002

Cool, in moderately thick cirrus overcast, light south breeze.

MKIV COMMENT: Mon Feb 11 17:10:06 GMT 2002

Removed heating pad from barrel.

COMMENT: Mon Feb 11 17:15:52 GMT 2002

Waiting for sky tx to clear dome wall.

Mon Feb 11 17:19:43 GMT 2002 CHIP Start Patrol

Mon Feb 11 17:19:58 GMT 2002 PICS Start Patrol

Mon Feb 11 17:40:09 GMT 2002 PICS End Patrol

PICS PROBLEM: Mon Feb 11 17:45:02 GMT 2002

In looking at yesterday's occulted image on hoike, I agree with Darryl that there is too much spill and I have changed the occulter back from #6 (1961) to #5 (1971).

These are same parameters that existed at the second CHIP crash, but not the first. Image in Camera window is offset, 1/2-way off screen to right.

CHIP PROBLEM: Mon Feb 11 21:55:00 GMT 2002

Did a kill/run cycle to end and recover from crash. (not so simple...

Kill does not stop all processes and several "Cancel Wait" have to be typed in to get rid of all the Waits that come up as things progress.)

This time I ran Video and recentered the image using the micrometer

controller. M1 value was way off at minus something. I ran it back to

5824. (approx. good value listed at 5830). I will leave it like that for

tomorrow's startup otherwise it will startup with the image offset.

WEATHER COMMENT: Mon Feb 11 22:02:12 GMT 2002

Continued thick cirrus overcast.

Mon Feb 11 22:04:50 GMT 2002 PICS End Patrol

Mon Feb 11 22:12:25 GMT 2002
