GONG PROBLEM : Sun Sep 15 22:03:28 GMT 2002

There could have been a conflict "race condition" between the workstation and the xterminal up here which prevented the xterminal from displaying an ximtool image window when it was started at the same time as the workstation ximtool window. So I shutdown the xterminal, then rebooted the workstation in the shelter, then came back up and rebooted the xterminal. Now both machines show everything they're supposed to again.
