Fri Mar 11 18:02:50 GMT 2005 CHIP LSD

PSPT PROBLEM: Fri Mar 11 17:59:14 GMT 2005

I was taking the temperature near the shutter. There was stray light from the open cover and the shadow of the temperature probe in the images while doing this test. Uniblitz informed me that they offer an "R1" option that is used in high temperature applications such as using an arc lamp as a light source. Temperature at the tube before the shutter was measured at 200 F. I will ask Uniblitz for more information on the R1 option.
