****GONG PROBLEM****: Wed May 4 19:49:55 GMT 2005

Back from GONG. Stopped datalogger and transferred incomplete data set to laptop--did not email data to Tucson at this time (data in mldata050503.dvb)

Turned datalogger setup off and disconnected powerstrip. Moved powerstrip

over to raw AC and moved camera power supply from UPS to power strip.

Restarted instrument.

Tucson has been blocked from accessing the O'scope, probably due to firewall issues. Added DNS address to O'scope setup.
