\*\*PICS PROBLEM\*\*: Tue Feb 14 00:26:03 GMT 2006

Mssrestore program appeared stalled part way thru processing. After allowing the display ample time to scroll thru process messages, I attempted to regain a prompt to log out or check if the process log indicated completion (in the background). Nothing happened when hitting "enter" aside from a line feed on the display. When I did a <CTRL>C, the process appeared to continue on, scrolling messages onto the terminal

window.
