PSPT COMMENT: Wed Jun 6 00:20:06 GMT 2007

Installed new narrow band centered CaK filter that was borrowed from NSO and sent to us. It included a ND filter which I mounted tilted with 4 steel washers at location -200, I removed the blank that was at that location since Allen removed the suspected faulty narrow band centered CaK filter that he shipped to Barr for testing back in 8/4/06.

COMMENT: Wed Jun 6 01:40:15 GMT 2007

The clamp holding the 2 weights at the end of the spar broke and the weights fell to the floor.

Will try to clamp a weight back on somehow.

COMMENT: Wed Jun 6 01:53:54 GMT 2007

Tried a different approach to balance the spar without the weights that fell off, instead of adding weight to the back handle I removed one U-weight from the front Brown angle-iron mount - just outward from the other U-weight that is still mounted there. Balance feels good but we may need to tweak it later.

GONG PROBLEM: Wed Jun 6 02:04:41 GMT 2007

Tape is still being copied after more than 4 hours, will need to remove and mail copy in left workstation drive tomorrow, tape in right drive is MLSO original copy.
