
Mauna Loa Solar Observatory Observer's Log

Tue Jun 12 16:39:07 GMT 2007

Year: 07 Doy: 163

Observer: koon

WEATHER COMMENT: Tue Jun 12 16:39:08 GMT 2007

Thick cirrostratus overcast, wind=5 mph from the SE, temp=46F.

____end____

COMMENT: Tue Jun 12 16:39:56 GMT 2007

No obs until clouds thin out.

____end____

****MLSO PROBLEM****: Tue Jun 12 17:01:54 GMT 2007

I can't download email from Kaiee, I can't login to Kaiee either, a root user has locked the display, Bunny has been on Kaiee since yesterday, I'll give her a call.

____end____

****MLSO PROBLEM****: Tue Jun 12 17:07:15 GMT 2007

It looks like there may not be any space left on Kaiee to allow me to get my email judging from my email program messages.

WEATHER COMMENT: Tue Jun 12 19:37:34 GMT 2007

Medium to thick cirrostratus, pausing some instruments.

____end____

Tue Jun 12 19:39:37 GMT 2007 MKIV End Patrol

COMMENT: Tue Jun 12 19:56:10 GMT 2007

Guy from U of Denver (?) came up to borrow some vacuum grease, couldn't find any.

____end____

****MLSO PROBLEM****: Tue Jun 12 19:56:51 GMT 2007

Still can't get email, also sent a message from Kaiee to "trouble" via rlogin from Nahenahe. Tried reading email that way and it is very cumbersome with the archaic UNIX mail program and interface. There are some huge files that make it even worse. I did see messages from Bunny that she is trying to fix the problem by deleting some large files that Mark Rast emailed us yesterday. But the problem is still there.

____end____

A NEW TAPE HAS BEEN PUT INTO KAIEE DLT DRIVE, Tue Jun 12 20:00:20 GMT 2007

COMMENT: Tue Jun 12 20:14:23 GMT 2007

Extended the dome slot.

____end____

****MLSO PROBLEM****: Tue Jun 12 20:20:23 GMT 2007

Email works now, Bunny left a phone message that she changed something else, and now it works. I was seeing messages from Outlook Express saying there wasn't enough space on /var/mail/.koon.pop to POP my messages, and a message saying my password wasn't being accepted, so it seems like it was 2 separate problems that Bunny fixed.

PSPT COMMENT: Tue Jun 12 22:18:37 GMT 2007

Obs.

___end___

PSPT PROBLEM: Tue Jun 12 23:01:49 GMT 2007

Didn't point correctly, paused obs and ran a guider ephemeris calibration, then restarted.

___end___

MKIV PROBLEM: Tue Jun 12 23:12:15 GMT 2007

Data not being transferred, checking it out, cycling power to KCC.

___end___

Tue Jun 12 23:17:28 GMT 2007

Tue Jun 12 23:24:57 GMT 2007 MKIV Start Patrol

MKIV PROBLEM: Tue Jun 12 23:25:32 GMT 2007

I had to reboot Nahenahe, there were messages in akamai window that Nahenahe wasn't communicating with akamai. Cycling KCC wasn't enough, rebooting Nahenahe and cycling KCC power looks good so far.

___end___

WEATHER COMMENT: Tue Jun 12 23:33:55 GMT 2007

Cirrus clouds are starting to pass over.

___end___

MKIV PROBLEM: Tue Jun 12 23:35:53 GMT 2007

Data gathering again.

___end___

WEATHER COMMENT: Tue Jun 12 23:36:16 GMT 2007

Low clouds also starting to come upslope.

___end___

MLSO PROBLEM: Tue Jun 12 23:43:31 GMT 2007

Along with the upslope orographic winds and clouds are thousands of little bugs flying by. The mk4 data are super spiky because of it, and you can see what look like bubbles all around the sun in the PICS limb images. I can't see any down low and up close but they have big backlit wings, it could be nysius bugs.

___end___

MLSO PROBLEM: Tue Jun 12 23:55:41 GMT 2007

The bugs are mostly gone now, strange, like a huge sparse swarm they were.

___end___

MLSO PROBLEM: Wed Jun 13 00:44:15 GMT 2007

Bugs are back.

___end___

MLSO PROBLEM: Wed Jun 13 01:07:02 GMT 2007

Bugs look like winged ants.

___end___

WEATHER COMMENT: Wed Jun 13 01:07:19 GMT 2007

Clouds are getting thicker, pausing some instruments.
