\*\*MLSO PROBLEM\*\*:  
Tue Dec 11 17:28:42 GMT 2007

Powerline broke just below NOAA buildings on 12/6 or 12/7, we have been without power on one phase since then and until that line was fixed yesterday. All systems seem good, breakers A1 and A3 were off so I turned them back on. Will reset answering machine and send backlogged daily logs.

COMMENT: Tue Dec 11 17:38:26 GMT 2007

Turned on small UPS that Allen turned off yesterday.

GONG COMMENT: Tue Dec 11 17:41:48 GMT 2007

Started up the sparcstation at MLSO, will leave the turret stowed as is due to continued rain and snow.

COMMENT: Tue Dec 11 18:16:46 GMT 2007

It looks like there are no back-logs to send. Eric, Allen, and I have come up everyday since the last log (last Thursday), but due to the power problem we weren't able to get any data or send any logs.

WEATHER COMMENT: Tue Dec 11 18:38:51 GMT 2007

The snow is piling up again, I'm going to leave while I can still safely walk and drive outside.
