Wed Dec 26 22:33:53 GMT 2007 MKIV Start Patrol

WEATHER COMMENT: Wed Dec 26 22:34:39 GMT 2007

Holes have been elusive and very brief. Thick orographic clouds arriving upslope as downslope winds die down.

____end____

Wed Dec 26 22:40:14 GMT 2007 MKIV End Patrol

PSPT PROBLEM: Wed Dec 26 22:39:30 GMT 2007

Passed by PSPT during one of the CaK series loops (1of3 to 3of3) and noticed that the shutter wasn't operating like earlier this morning. Decided to watch for a bit and found that the shutter worked during the Red/Cak/Blue series loops (1of3 to 3of3). Earlier problem was occurring during the CaK series also. Appears something in the program has changed so exposures during the CaK series are non-exposures and have nothing to do with a glitch that resetting the PSPT and/or PC would have fixed in the earlier fix attempt.

____end____

PSPT PROBLEM: Wed Dec 26 22:53:28 GMT 2007

Hmmm... PSPT is going thru another CaK series and it is taking images this time, shutter is operating.

____end____

Thu Dec 27 00:07:44 GMT 2007 CHIP End Patrol

WEATHER COMMENT: Thu Dec 27 00:07:31 GMT 2007

In thick cirrostratus overcast and in thick orographic clouds. Closing domes as a precaution.
