WEATHER COMMENT: Mon Dec 29 17:54:44 GMT 2008

Overcast, wind southwest 5-10 mph, temp 35F. The road was passable til the end of the pavement at the public parking area. Past the gate up to the NOAA buildings was still snowy and slick so I parked below and walked up.

WEATHER COMMENT: Mon Dec 29 19:21:10 GMT 2008

Still overcast, snow surface is crusty and slick - going down to the gong shelter to do the pm was exciting.
