\*\*PICS PROBLEM\*\*: Tue Aug 4 20:47:23 GMT 2009

Bearing at motor end of Halle filter stage leadscrew is destroyed. I can't find any spare bearings. To spec a bearing and order it and repair damage would take a fair amount of time, since PICS will soon be decommissioned to make room for CoMP and because I'm overloaded with work as it is I'm going to leave this repair as a low priority right now. We can still run PICS and get disk images and limb images through the Halle filter which I locked in place. The normal limb image function of Patrol is nonfunctional now.

Can't get this going, probably an MCC problem, PICS stalled at same time.

Error messages on console window:

readstatus: Interrupted system call

Will stop these for today.
