PSPT PROBLEM COMMENT BY ALLEN: Tue Dec 28 00:53:08 GMT 2010

I was unable to get the ups to start. I removed the cover and poked around inside but found nothing obviously bad. Eaton bought Best Power some time ago and all the Best units are obsolete. I called the 800 support number and was told by tech support that our unit was discontinued 8 years ago and was no longer supported, the only spare parts available are batteries and fans.
