GONG COMMENT BY DARRYL: Sun Jan 30 19:30:23 GMT 2011

Back from GONG, they aren't Gigabit-ready with their network, they do have CAT6 cabling going to the 8 port 10/100 Mbps switch and the 100baseFX fiber optic media converter, both of those items need to be upgraded to Gigabit speed capability to use that capability on our new router, I'll let GONG know.

NOTE BY DARRYL: Sun Jan 30 20:08:48 GMT 2011

I brought up the new server and router from HAO, the 2 new network switches from GONG and the fiber optic patch cables I ordered to get GONG on the new switch. Will install as much as I can today.

NOTE BY DARRYL: Mon Jan 31 01:51:41 GMT 2011

I installed both new network switches from GONG and the new network router. Unfortunately the heavy server is setup with slides that don't fit any of our cabinets so I couldn't mount it in the space I had reserved for it. Either we get a new different small cabinet for it or lay it on top of the cabinet where Ulua is now, or we'll have to make or buy some kind of custom L-brackets for the server to slide in on, it can bolt in place at the front after it's slid all the way in.
