****GONG PROBLEM COMMENT BY DARRYL**:** Tue Oct 25 20:11:06 GMT 2011

The new MLGONG-X terminal that I installed on Sunday shutdown this morning, I got the login screen when I moved the mouse, I had to login and bring up the observing monitoring programs. I'm running all normal tasks including the ds9 image display that would cause shutdowns with the previous 2 terminals, GONG Ops thinks this monitor is more resistant to those unsolicited logouts that we've been getting ever since we moved to the new monitor systems earlier this year. We'll see, if so then I'll return the older monitor which is currently near the PSPT PC.
