Year: 12 Doy: 050

Observer: koon

WEATHER COMMENT: Sun Feb 19 19:12:38 GMT 2012

Had 8+ inches of snow last night due to a storm that is still lingering nearby, still snowing on and off, freezing, made it up to parking area barely.

GONG COMMENT BY DARRYL: Sun Feb 19 19:13:57 GMT 2012

Stowed and covered the instrument due to the snowy weather.

NOTE BY DARRYL: Sun Feb 19 19:14:20 GMT 2012

I stopped at the ASIAA site down the road, there are 2 people there that only have a sedan, they didn't want a ride out today though their car is stuck in the snow. I told them I'd ask NOAA and MLSO folks to check on them tomorrow if the weather still looks bad enough that they can't drive down, and I'll check on them Tuesday morning if I can get that far.

COMP COMMENT BY DARRYL: Sun Feb 19 19:17:57 GMT 2012

Looks like power went out last night but came back on, we have power now, the COMP PC and Pulizzi channels were off. I turned everything except the camera channel (#3) back on, to conserve LN2.

____end____

NOTE BY DARRYL: Sun Feb 19 19:42:24 GMT 2012

Checked on everything and put some drip catchers were drips are occurring or may occur. The weather is n't clearing, I'm heading down before the weekend snow crowds start coming up and blocking the road.
