
Mauna Loa Solar Observatory Observer's Log

Fri Apr 24 16:46:52 GMT 2015

Year: 15 Doy: 114

Observer: berkey

WEATHER COMMENT: berkey: Fri Apr 24 16:46:54 GMT 2015

temp 48f, wind 10 mph from SE, thick cirrus :(Coronal observations highly unlikely today

____end____

PSPT COMMENT BY berkey: Sat Apr 25 00:44:04 GMT 2015

Pspt dome az drive was slipping a bit, tightened the spring to get better mating between the rack and pinion gear.

Things seem to be working normally now.

____end____

GENERAL OBSERVATORY COMMENT BY berkey: Sat Apr 25 01:45:05 GMT 2015

skies have improved
