Observer: waters

WEATHER COMMENT: waters: Sun Sep 25 16:35:07 GMT 2016

Temp 39F with windspeed at about 6mph from the West. Scattered, thin cirrus covering most of the sky and the fog is at least at 14,000ft. The bottom of the board walk is a bit icy, I slipped shortly after turning to come up. That portion of the board walk doesn't get sunlight till after 645am local, so be careful coming.
