*****EVENT COMMENT BY waters***** : Sat Oct 1 01:10:16 GMT 2016

Lots of activity on the West-Southwest limb of the Sun; a couple of prominences morphing as plasma moves through them, changing how they look; and some nice surges. Can be seen in GONG.

GENERAL OBSERVATORY COMMENT BY waters: Sat Oct 1 01:56:43 GMT 2016

Absolutely crazy looking cirrus we had all day today which was amazing to see but unfortunately, none of it cleared up after the short window we had this morning. Hopefully we can get a better sky this weekend!
