GENERAL COMMENT BY berkey: Tue Apr 25 01:50:29 GMT 2017

Clouds clouds all day.

Spent some time worknig with Gong guys. Including their fiber from the netgear switch up to the new cisco swich. We did a bit of testing and things seem ok but if there is an issue such that we need to reverted the fiber needs to moved from the switch just above the kvm to the switch just below kodiak
