GENERAL OBSERVATORY COMMENT BY waters: Wed May 10 00:13:09 GMT 2017

I was going through the box that we recieved from Boulder, putting things away and straightening the contents when I noticed some goo on the bottom. The epoxy part B is oozing slowly out of the bottom of the tube. It looks like part A is fine, just a bit sticky from the leak. It's currently back in its box in a ziplock bag so it won't ooze on anything.

Wed May 10 01:21:48 GMT 2017 COMP End Patrol

GENERAL OBSERVATORY COMMENT BY waters: Wed May 10 01:28:59 GMT 2017

Last hour and a half, the sky has been a tease of blue sky with clouds blowing through. Hopefully tomorrow will be a bit clearer in the afternoon.
